# **Do this companies who offer a #1 ranking on Search Engines really deliver?**

I got a call from one today offering my small business a #1 ranking on Google if I signed with them. They want over \$5,000 for the year.

Nobody can guarantee you rankings

"Here is a piece of advice : stay away from such companies. Google itself states on their website that no Seo company can guarantee you rankings. Well if you think such SEO companies are bigger then Google or you wish to take a risk and get your website in trouble with Google or Bigger search engines like Bing then leave right now. Try your luck :) "

Regards,  
Thakkar
