How do i get #1 ranking on a search engine without paying?

I would like to get top ranking on search engines like yahoo and google. What is the best way to do it? I do not want to pay some service for this.

We got to the top of the search engine without paying anyone. My website is #2 (and sometimes #1) out of 6.14 billion websites for the very competitive keyword "home business" (after Entrepreneur.com). And we rank #1 for many of our other keywords.

I followed Brett Tabke's (of WebmasterWorld.com) advice in his Successful Site in 12 Months with Google Alone: 26 steps to 15k a day post <http://www.webmasterworld.com/forum3/2010.htm> . I find this to be the most succinct, most effective and most comprehensive of all articles written on getting to the top of the search engines.

The Yahoo section of WebmasterWorld.com has the best tips in terms of ranking in Yahoo.

If you could follow each of the advice listed, I assure you that you can start improving your search engine rankings in no time. It is not easy, but it can be done.
